### 1. Single Handle Faucets

Single handle faucets are the most popular choice for kitchen sinks. They come with a single lever that controls both the water temperature and flow. These faucets are easy to use and install, making them a convenient option for any kitchen.

### 2. Pull-Down Faucets

Pull-down faucets feature a spray head that pulls down directly into the sink. These faucets are great for washing dishes and filling pots with ease. They also come with various spray options for added versatility.

### **3. Pull-Out Faucets**

Similar to pull-down faucets, pull-out faucets come with a spray head that pulls out towards you. This feature allows for more flexibility and reach when washing dishes or cleaning the sink.

### **4. Wall-Mounted Faucets**

Wall-mounted faucets are a stylish and modern choice for kitchen sinks. These faucets are installed on the wall above the sink, creating a clean and streamlined look. They are great for kitchens with limited countertop space.
