K•TERMITE

1. SUBTERRANEAN TERMITE TREATMENTS

These termites live underground and create tunnels that lead to your home. We create a chemical barrier in the soil around your house to prevent them from entering.

2. DRYWOOD TERMITE TREATMENTS

Treatments are applied at entry points to stop termites in their tracks, effectively addressing drywood termite issues.

3. FUMIGATION FOR TERMITES

For severe infestations, we offer tent fumigation, ensuring complete eradication of termites throughout the home.

4. BORATE BARRIER TREATMENTS

We treat attics and crawl spaces with a premium borate solution that penetrates deep into the wood, eliminating current termites and preventing future infestations.

OUR TREATMENT PROCESS

1. TREATMENT PLAN SELECTION

After completing a thorough inspection, we recommend the best treatment for your home. Options include localized spot treatments, soil barrier applications, fumigation, or preventive borate protection.

2. PROFESSIONAL APPLICATION

Our licensed technicians apply treatments with precision, using approved methods to eliminate termites safely and effectively.
